		Cross Section of SC2-1 (4/6)	JUNE, 2022	CHECKED BY: Jo, Jin Hoon	B-28-04

Cross Section of SC2-1 (5/6)

S=1:100

Unit is meter(m) of the international system of units(SI)
The Quantity was calcuated in cross-section and the chain distance is 50m.
The road area presented in this cross-section must be changed to the form presented in the standard cross-section
(The position of the road section is moved to the end of the pipe excavation section, The quantity of site clearing according to the above change will be settleld accroding to the survey results at the time of construction)

		Cross Section of SC3 (1/3)	JUNE, 2022		B-30-01

Cross Section of SC3 (2/3)

S=1:100

Unit is meter(m) of the international system of units(SI)
The Quantity was calcuated in cross-section and the chain distance is 50m.
The road area presented in this cross-section must be changed to the form presented in the standard cross-section
(The position of the road section is moved to the end of the pipe excavation section, The quantity of site clearing according to the above change will be settleld accroding to the survey results at the time of construction)

Profile

S=1:100

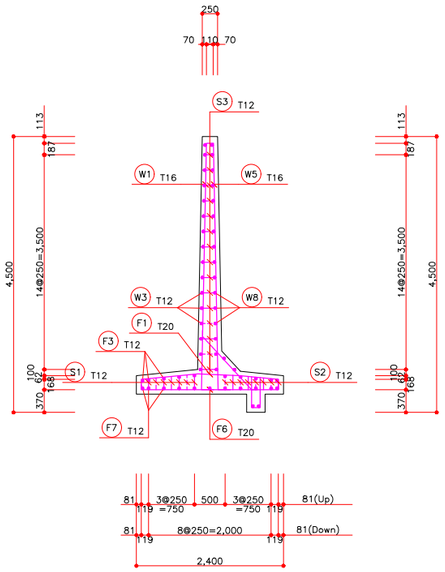
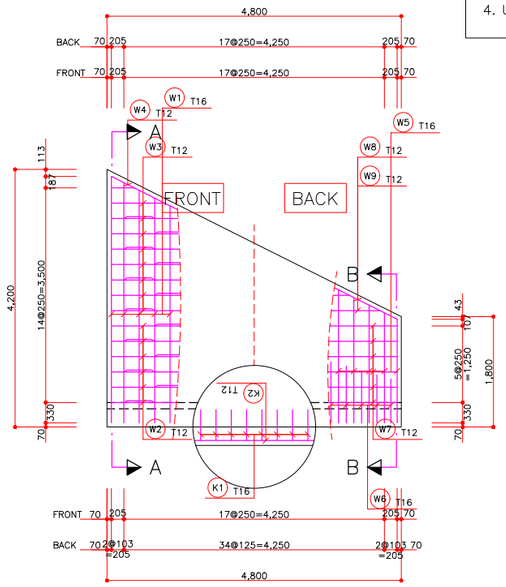
Typical Section(A-A)

S=1:50



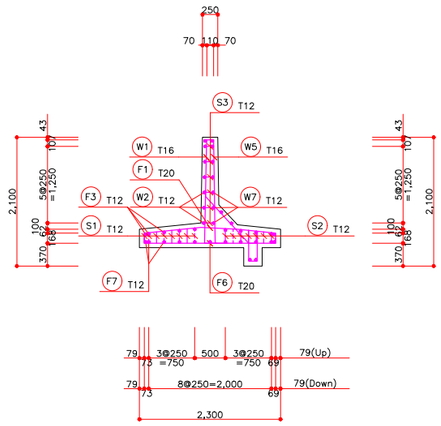
Wall Structure

S=1:50



Typical Section(B-B)

S=1:50



Note

1. The backfill material is the same material as the road filling material, using a road bed or a subgrade, and the unit weight should be 19.0 kN/m3 or less and the internal friction angle of 25 degrees or more.
2. Culverts and special foundations installed in areas with soft ground or different ground conditions should be reviewed separately.
3. Perform foundation ground compaction during foundation construction and pour 100mm thick Lean concrete for smooth structure construction.
4. Unit is millimeter(mm) of The International System of Units(SI)

		Wing Wall of SC Offtake(9/12)	JUNE, 2022		C-02-09

Wing Wall of SC Offtake(10/12)

Type D (3.9m- 1.5m)

Note

1. The backfill material is the same material as the road filling material, using a road bed or a subgrade, and the unit weight should be 19.0 kN/m3 or less and the internal friction angle of 25 degrees or more.
2. Culverts and special foundations installed in areas with soft ground or different ground conditions should be reviewed separately.
3. Perform foundation ground compaction during foundation construction and pour 100mm thick Lean concrete for smooth structure construction.
4. Unit is millimeter(mm) of The International System of Units(SI)

Note

1. The backfill material is the same material as the road filling material, using a road bed or a subgrade, and the unit weight should be 19.0 kN/m3 or less and the internal friction angle of 25 degrees or more.
2. Culverts and special foundations installed in areas with soft ground or different ground conditions should be reviewed separately.
3. Perform foundation ground compaction during foundation construction and pour 100mm thick Lean concrete for smooth structure construction.
4. Unit is millimeter(mm) of The International System of Units(SI)

Flow Meter Chamber(1/2)

S=1:50

Unit is meter(m) of The International System of Units(SI)
Puddle flow meter of Insertion type is using the concrete chamber of ultrasonic.
The Chamber may change depending on the site and supervisor

		Flow Meter Chamber(1/2)	JUNE, 2022		C-08-02

Flow Meter Chamber(2/2)

S=1:50

Unit is meter(m) of The International System of Units(SI)
Puddle flow meter of Insertion type is using the concrete chamber of ultrasonic.
The Chamber may change depending on the site and supervisor

TYPE3: 3.5m x 3.5m x H(Under 5.5m, D=1000mm~1400mm)

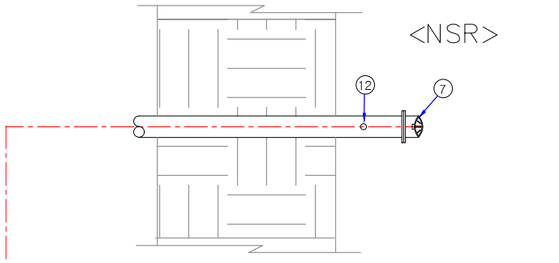
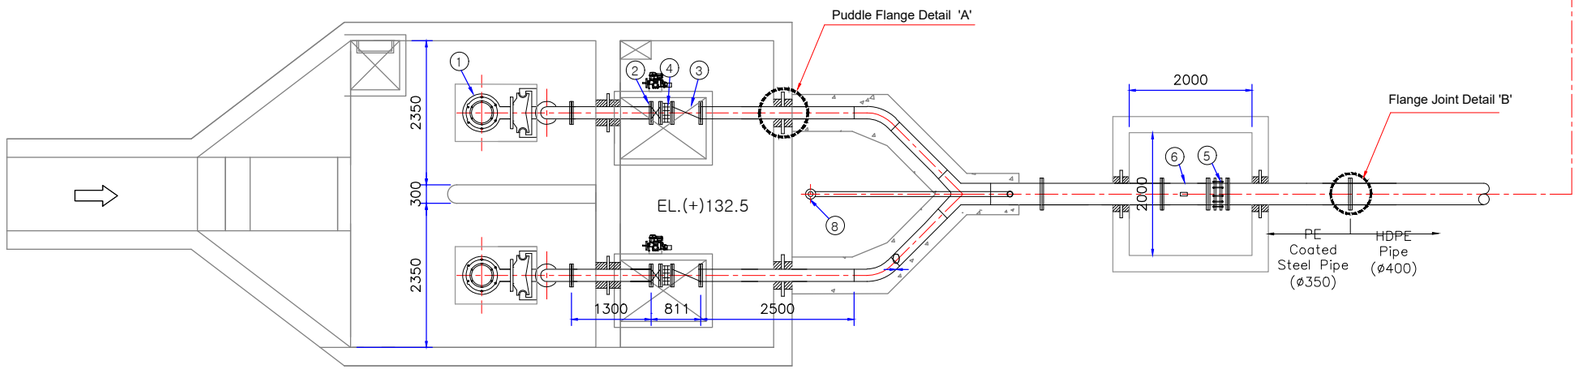
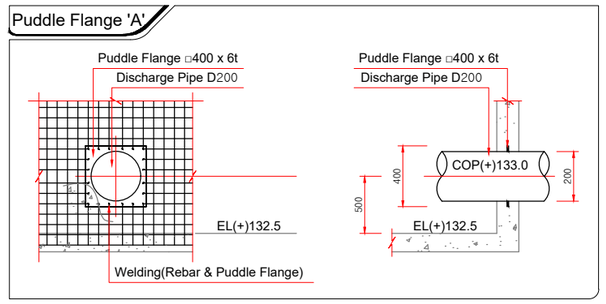
PUMPING STATION 1 Floor Plan

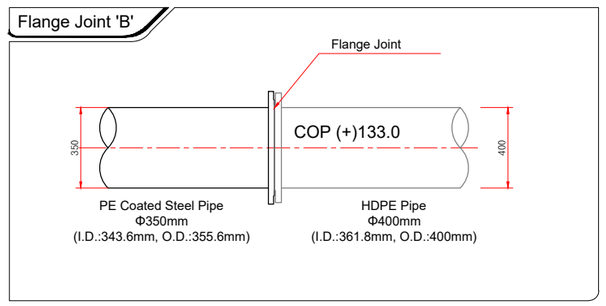
Unit is millimeter(mm) of The International System of Units(SI)

No	Item	Type	Q'ty	Unit	Remarks
1	Submersible pump	D200 x 11kW	2	EA	
2	Butterfly Valve	D200, Electric	2	EA	
3	Swing check valve	D200	2	EA	
4	Dismantling joint	D200	2	EA	
5	Dismantling joint	D350	1	EA	
6	Ultrasonic flow meter	D350, Multi Path	1	EA	
7	Flap valve	D350	1	EA	
8	Air valve	D80	1	EA	
9	Gate valve	D80	1	EA	
10	Drainage pump	D50 x 1.5kW	1	EA	
11	Air vent	D100	1	EA	









Pump type	Submersible Pump			
Bore (Dmm)	Total Discharge quantity (㎥/hr)	Discharge quantity of each pump (㎥/hr)	Total head (m)	Electric motor output (kW x P)
200	471.6	235.8	7.7	11kW x 6P

Note

1. The common bed of a pump shall be fixed strongly with reinforcing rod or the steel frame of the existing bed.
2. The elevations on this drawings are rough and only reference.
3. All flange standard which is used shall be produced in identical standard.

NOTE(WATER LEVEL)

1. The control unit is attached to the inside of the RTU panel.
2. The water level measurement sensor is for 0.3 to 10 M.
3. The control unit and sensor use an F-CVVs cable and construct it to completely shield it.
4. The ultrasonic water level meter bracket is firmly fixed on the upper part and is installed so as not to interfere with the ultrasonic measurement angle range and the pump chamber wall.
5. The ultrasonic water level meter is waterproof and completely waterproof (including piping) after installation.

NOTE(WATER LEVEL)

1. The control unit is attached to the inside of the RTU panel.
2. The water level measurement sensor is for 0.3 to 10 M.
3. The control unit and sensor use an F-CVVs cable and construct it to completely shield it.
4. The ultrasonic water level meter is waterproof and completely waterproof (including piping) after installation.
